WORK EXPERIENCE

Cachelan · May 2024 - Present
Software Engineer · Toronto, ON

- Modernized a 14+ year old codebase, enhancing performance and maintainability.
- Implemented new features by directly engaging with customers, increasing conversion rate for a paid feature by 100%.

Shopify · Sept 2021 - May 2022
Software Engineering Intern · Toronto, ON

- Championed the development of a novel component within the Shopify admin platform, which is now actively utilized by over 10,000 merchants daily.
- Engaged in close collaboration with merchants to gather valuable beta testing feedback, driving improvements and customer satisfaction.

HomeX · May 2021 - Aug 2021
Software Engineering Intern · Toronto, ON

- Utilized Grafana API to monitor and log the service uptime of over 12 different services, improving operational efficiency.
- Designed and developed an uptime dashboard that enhanced system reliability.

Queen's University · September 2019 - April 2021
Teaching Assistant · Toronto, ON

- Facilitated student success through weekly office hours, assignment grading and individual support.
- Promoted a positive learning environment by providing feedback and working with students directly.

PROJECTS

Hexcodle (www.hexcodle.com) · July 2023 - Present
Daily Wordle-like Color Guessing Game · www.hexcodle.com

- Conceived a progressive web app (PWA) game enjoyed by a growing user base of thousands daily.
- Features on Yahoo News, Hacker News front page and Reddit.

Classio · Jan 2020 - July 2022
Algorithmic Class Scheduler · ekimerton.github.io/classio

- Created a web application that algorithmically automated class scheduling, reaching over 2,000 users and simplifying the course selection process for students.

EDUCATION

Queen's University - Bachelors of Computer Science, GPA 3.8 · **Sept 2018 - May 2023**
